SITUATION SUMMARY

Castella Water Tank Rupture, Shasta and Siskiyou Counties

- Per Cal OES IDO: The community of Castella had a water tank rupture on 10/08/15. They are currently under a boil water order with samples expected to be taken on Monday for testing. State Water Board Division of Drinking Water is aware of the situation.

City of Yreka Water Main Break, Siskiyou County

- Per Cal OES IDO: A water supply line suffered a break on 10/09/15. The city is currently under a boil water order. [Water sample testing began yesterday and results are anticipated today](#). Fairchild Medical Center is currently operating from potable water trucks.

Cal OES Activation Status

- The Cal OES State Operations Center (SOC) transitioned to Joint Field Office (JFO) operations with FEMA to support recovery operations.

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

Weather of Concern

- No significant Weather Watches or Warnings are in effect.

Active Weather Warnings, Watches and Advisories by County:

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

A warming and drying trend can be expected through much of the workweek. Temperatures will reach well above normal values by Tuesday and Wednesday for interior locations.

Medford Weather:

High pressure aloft will build over the forecast area through at least Thursday, and this will lead to increasingly hot conditions over much of the region this week. Many record highs may be within reach this week, especially on Thursday. Some cooling is expected on Friday, especially at the coast. The forecast area can expect some rain and cooler weather over the weekend.

Reno Weather:

Strong high pressure will remain over northeast California and western Nevada through midweek, bringing well above average to near record temperatures along with mainly light winds. Low pressure moves into California and Nevada Thursday and Friday for cooling temperatures and a chance for showers.

San Francisco Weather:

Warm weather is forecast through Tuesday along with dry conditions in most areas. A low pressure system currently located west of the Baja Peninsula will move into southern California by the middle of the week. This low will bring a chance of showers to areas south of San Jose as early as Tuesday afternoon and continuing through Thursday. The best chance of showers in these areas will be on Wednesday and Wednesday evening, when there is also a chance of thunderstorms. The next weather system will bring rain chances to the northern part of the forecast area on Saturday and Saturday night.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Sacramento Weather:

Warm and dry weather continues through at least midweek. A weather system moving up from southern California may bring a few showers south of Interstate 80 later in the week.

Hanford Weather:

High pressure will gradually break down as a weather system moves north from Baja bringing a chance of showers Tuesday to the Sierra and becoming more widespread across the central California interior Wednesday through Friday. There will be a brief break on Saturday before a colder system drops in from the eastern Pacific Saturday night and continues through Sunday night with a slight chance of showers across the central California interior.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Today will be another hot day across much of the region. An upper low moving toward the region will bring a cooling trend through midweek, with temperatures back down to near normal levels. There is a slight chance of showers and thunderstorms Wednesday through Thursday night, possibly lingering into Friday in the mountains. Another trough may bring showers to the region for the second half of the weekend.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

High pressure aloft will continue well above average high temperatures today. Weak offshore flow will bring locally gusty east winds to 25 mph near the coastal foothills this morning. A low pressure system to the southwest will move slowly inland through central and southern California Thursday and Friday, moving into Arizona Saturday. This will bring a chance of mainly afternoon and early evening showers and thunderstorms, mainly to the mountains and deserts with coverage and chances of a little greater Wednesday night into early Friday. A second low pressure system from the northwest could bring additional showers and thunderstorms for Saturday night into early next week.

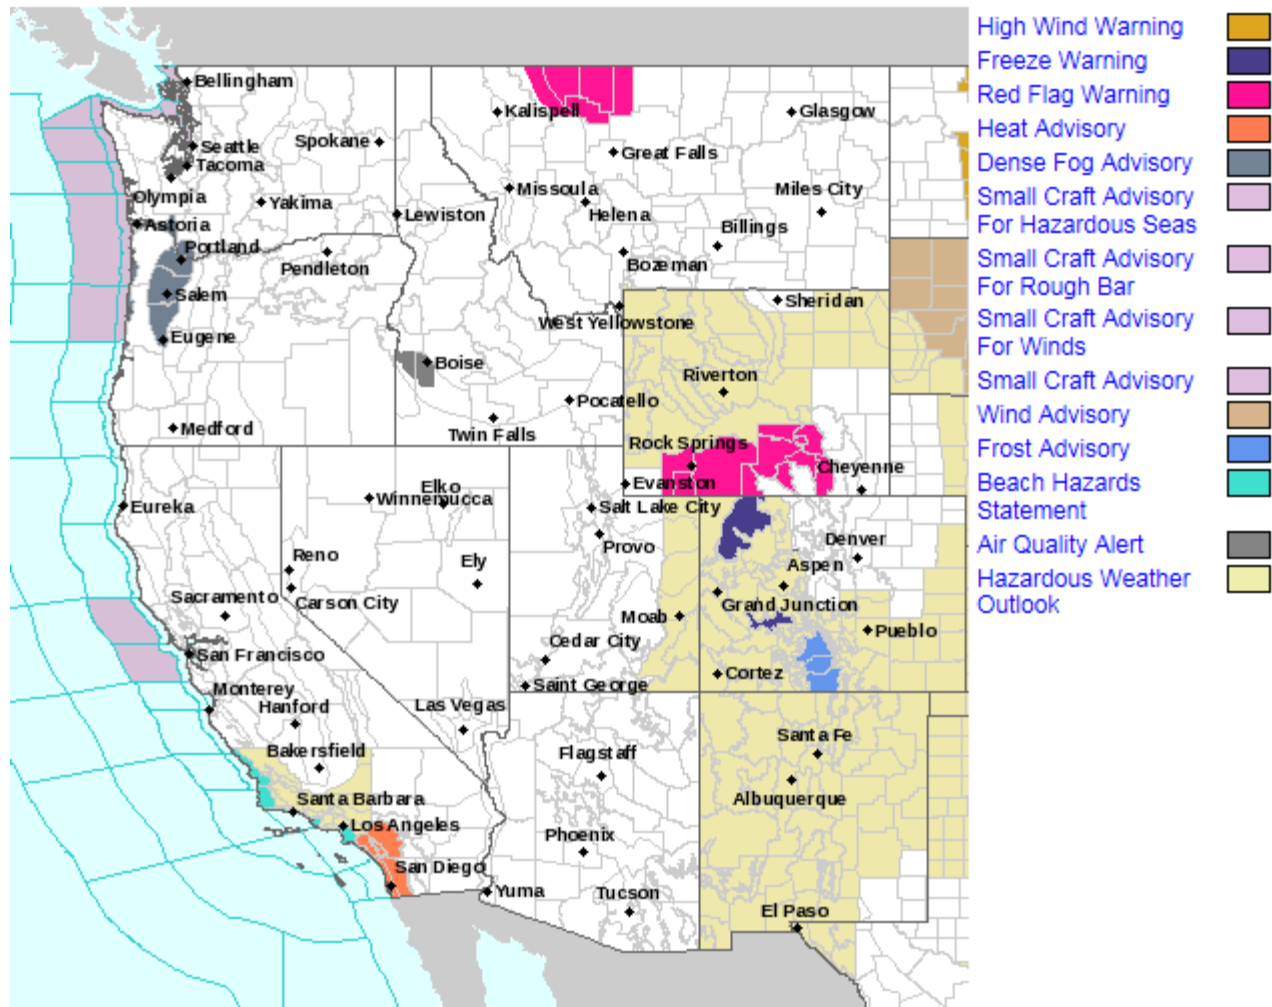

Southeast California Weather:

A strong high pressure system is forecast to build over the region through Wednesday. This will result in partly cloudy skies and unseasonably warm afternoons. The high pressure system is forecast to weaken late Wednesday followed by a gradual cooling trend Thursday through Sunday, along with a chance of showers and thunderstorms.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on alternating Wednesdays.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC every Monday at 1100 hours.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

CAL OES MISSIONS

Closed Cal OES Missions

2015-LAW-18985 10/11/15 1830 hours: IERCC reported a Delorme In Reach activation on Scout Carson Trail near Silver Lake in the El Dorado National Forest, Amador County. The user of the device reported that he had suffered a broken ankle while hiking on the trail. I notified Amador County Sheriff personnel. Amador County requested a hoist equipped rescue helicopter for the mission. CHP was unavailable. Placer County Sheriff and the California National Guard were contacted for helicopter availability. The response of the helicopter(s) would be delayed due to a lack of on duty personnel. Amador County Search and Rescue personnel elected to hike to the victim and assist him out. The Amador County SAR personnel located the victim, and assisted him . He was transported to a hospital for medical treatment of an ankle injury. IERCC advised. **Mission Closed**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
